Attn: Colonel W. Scott Wood, Base Commander

SUBJECT: No Further Action  
Building 730 Drainage Ditch, U.S. Army Combat Support Training Center,  
Camp Parks, Dublin, Alameda County

Dear Col. Wood:

I have reviewed the site investigation report *Draft Soil Sampling Results Building 730 Drainage Ditch, U.S. Army Combat Support Training Center, Camp Parks*, dated November 19, 2005, (submitted to this Water Board on April 21, 2006) and concur with the report's recommendation that no further actions are needed related to the Building 730 Drainage Ditch. The Building 730 Drainage Ditch is a surface water drainage ditch adjacent to the PRFTA-13 tank site. The PRFTA-13 tank site is being investigated under separate cover.

Available data indicate petroleum hydrocarbons from the adjacent PRFTA-13 site have not affected the Building 730 drainage ditch, nor has there been impacts measured in the drainage ditch at any point downstream. Although available data indicate ground-water flow is toward the southwest (toward the drainage ditch) and analytical data indicate ground water beneath the drainage ditch may be impacted by petroleum hydrocarbons from the PRFTA 13 site, we concur that there is no evidence that ground water has recharged to the drainage ditch and that there are no impacts to surface or shallow subsurface soil within the drainage ditch.

If you have questions please call me at (510) 622-2379 or email [gleyva@waterboards.ca.gov](mailto:gleyva@waterboards.ca.gov).

Sincerely,

George Leyva, EG  
Project Manager
